A Sales Experience
Touching on Future

ECHO BİLGİ YÖNETİM SİSTEMLERİ A.Ş.

Founded **in cooperation with Aktif Bank and Robotpos** to act as a solution partner in payment systems of the national and local chain enterprises operating in retail industry, Echo Bilgi Yonetim Sistemleri A.S. has been maintaining its business operations since August 2016.

Acting with an aim to become a **"New-Generation Solution Partner"** with EchoPos brand in retail industry, EchoPos offers end-to-end payment systems and integration solutions for front and back offices of enterprises by means of the Windows-based automation systems integrated into the new-generation cash registers.

EchoPos, communicates easily with 3rd party applications thanks to real-time and two-way communication protocols, and is customizable easily for project requirements thanks to its simple and scalable architecture, and it can be managed at any location through mobile and web applications.

END-TO-END SOLUTION

EchoPos is the exclusive service provider for all necessary hardware and software ranging from Cash Registering Device to printer, and from LCD touchscreen to PCPOS software.

CENTRAL MANAGEMENT

Thanks to the web-based central management of Echo Portal, all cash registers owned by your enterprise, and all information processes through these cash registers enable the central management of the entire infrastructure by means of an authorized interface.

TWO-WAY COMMUNICATION

Since the cash registers and the ERP of the enterprise are always in connection, the information flow between the front and back office is of both two-way and real-time nature..

NEW-GENERATION SOFTWARE ARCHITECTURE

The infrastructure and the new-generation software architecture, created by means of the latest hardware & communications technologies, provide the opportunity for enterprises to find a solution for their all kinds of needs.

WHAT ARE THE ADVANTAGES OF ECHOPOS?

EchoPOS, a New-Generation Cash Register POS ecosystem, offers products and services **with a high added value**, and provides the **advantage of efficiency, speed and competition** to enterprises in these changing and developing market conditions..

If you lease all hardware-software units and the service offerings, your cash registers will pay for their rental fees while you maintain your business operations, meaning that the entire initial investment cost of cash registers remain in your pocket.

Being able to operate in harmony with the ERP system and the former-cash register ERP communication type of the enterprise, EchoPOS is capable of being integrated easily. In this way, the entire infrastructure can be started to be managed centrally as of the very first day.

Both the information processing and all concerned field managers have a mobile access to the central management interface, and manage the shops, cashiers and cash registers on real-time and uninterrupted basis.

Marketing departments can now realize the campaign set-ups by means of the specially-designed interfaces, and publish the campaign images-videos on the customer screen.

ECHOPOS: THE EASIEST POS

You can **customize all menus** on cashier screen **with a single touch** by shops/regions/cities/cashiers across Turkey, check the Internet connection of the shop, and access the management of cash registers instantly. You can grant **special access authorizations** to all regional managers and field managers to enable them to access all details of their shops.

LOYALTY CARD MANAGEMENT

EchoPOS can directly be integrated into all loyalty programs such as bonus, cheque and loyalty card, etc. in place across your enterprise, or the 3rd party companies you partner with.

CAMPAIGN MANAGEMENT

You can realize your campaign set-ups instantly across shops, regions or Turkey, and publish the campaign images-videos on the 10.4" LCD customer screens of PCPOS.

IOS/ANDROID LOYALTY (OPTIONAL)

You can enjoy the loyalty management application, developed for IOS and Android and integrated into EchoPOS, to create your own loyalty application, and make it available for use of your clients and take a step forward under this harsh competitive environment.

MODULAR INFRASTRUCTURE

You can integrate the revenue-increasing services with added values such as bill collection, GSM/TRY loading, etc. easily into the system.

PLUG-AND-PLAY INSTALLATION

Your cash registers are delivered to your shops ready-to-use. They are customized for the respective shop with a short-time IP identification process. The entire EchoPOS set is capable of operating in any other shop in important and emergency cases.

EASY TRAINING & PRACTICAL USE

The cashier training is quite short and easy thanks to the touch-sensitive PCPOS hardware, software functions and **user-friendly interface**. The practical use of it enables the cashier to complete the cash transactions easily.

END-TO-END TECHNICAL SUPPORT and SERVICE

EchoPOS is the exclusive technical support and service provider for all hardware and software provided by the enterprises for the new-generation cash register POS system. It offers **end-to-end support services across Turkey** in accordance with the terms and conditions provided under the service level agreement.
